

# Practicing Implementation Effectiveness WORKSHOP

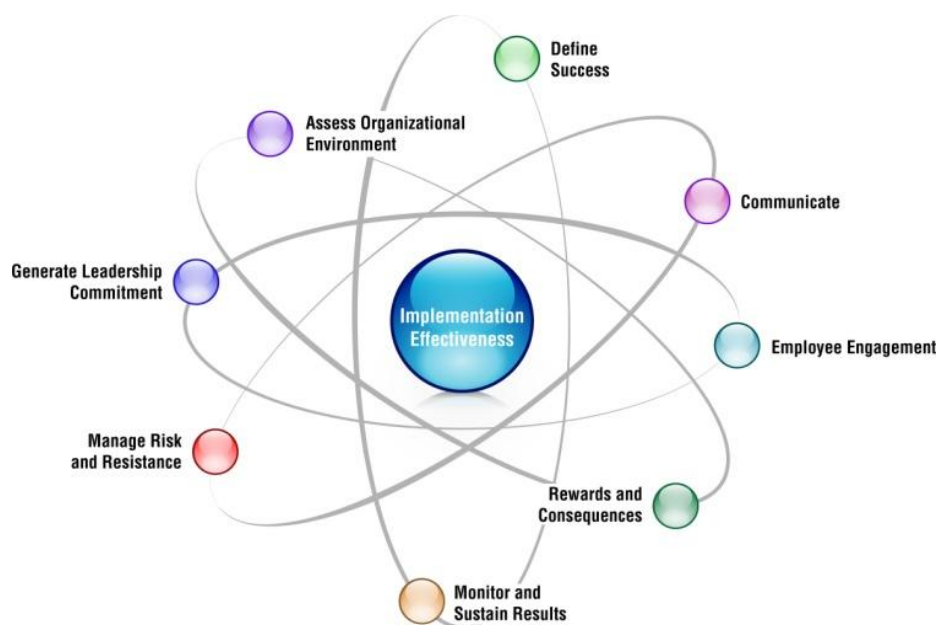

## WHO SHOULD ATTEND?

This two day workshop will transform individuals into agents of change, enabling them to apply the skills and knowledge within their organization to drive sustainable change. Designed to build the change capability of project leaders, team members and those responsible for delivering business results, this program is equally relevant for internal and external change practitioners responsible for building organizational change capability. This two day workshop will equip participants to maximize outcomes of initiatives they are charged with executing, increase change skills and knowledge within their organizations and improve change efforts to achieve bottom line results.

## OVERVIEW

The Implementation Institute's *Practicing Implementation Effectiveness* workshop is an intense and interactive two-day educational event. Participants will work to understand the Critical Success Factors of Implementation Effectiveness while engaging in a sophisticated business simulation, played competitively by teams, that provides a compelling hands-on lab for discovering and testing the link between strategy and execution.

## WORKSHOP ELEMENTS

- Participants will bring a current change initiative from their organization to work with during the session. They will begin outlining and applying the knowledge acquired during the workshop to this initiative.
- Participants will work in a fast-paced learning environment that mixes camaraderie with competition.
- Individuals will learn new skills that will enhance the ability to lead sustainable change and enable true ROI contribution.

## LEARNING OBJECTIVES

- Identify and define critical success factors leading to effective implementation.
- Define, track and measure implementation success metrics driving sustainable results.
- See and feel the impact of your actions as you make implementation decisions in a simulated business environment.
- Leverage the role of the sponsor to drive desired business results.
- Gather, analyze and apply data on culture, employee engagement, organizational alignment, risk and resistance to increase implementation success
- Apply a repeatable process for continued successful implementation.
